THE COLOUR COUNSELLOR

## Discovering Your True Colours can Change Your Life!

Jules combines years of experience as a Colour Consultant and stylist, to provide professional and transformational talks, which are a once in a lifetime experience. She puts forward a new approach to looking younger, healthier and happier through colour and style analysis, achieving powerful results.

Jules speaks about:

- how colours relate psychologically to the personality
- how to uncover the secret in the eyes
- how to reveal colours to match skin tone
- how to find out what colour make up to wear
- how never to make expensive shopping mistakes again
- what new fashion trends to wear for individual body shapes

Jules has helped hundreds of women to look and feel their best, from housewives to celebrities. Her inspirational approach shows how unlocking the secrets of the eyes and matching personality types with true colours will help women to discover their true potential.

She imparts a fascinating insight into the whole field of colour as it relates to each individual. This can have practical and profitable results, which will be beneficial forever and one of the best investments ever made.

Jules looks at the facial skin in the way that a plastic surgeon would when deciding how to improve a client's appearance. Choosing the correct colours can significantly reduce these issues sometimes as dramatically and with such a transformational effect as a surgical face lift! Her aim is to concentrate on ensuring that the complexion and features look as attractive as possible.

The right colours can have therapeutic benefits both physically and emotionally, but the wrong colours can have a detrimental effect on both the skin and the emotions, draining ones energy, dulling or paling the complexion, or worse still ageing it by many years!

Black is one such colour that can damage the face particularly as women age. Whilst many believe black to be slimming, chic and easy to co-ordinate Jules is on a mission to help show women how to wear it without highlighting all the signs of ageing. As a result of her experiences she has written a book called How **Not** to Wear Black, to help all women understand whether it suits them or not.

### HOW NOT TO WEAR BLACK

“This is the first self help book for women of its kind, a book that looks at the psychology behind why women wear black. In certain cultures it is expected that women hide themselves behind black, however, women worldwide choose to wear it for different reasons: they believe it to be slimming, smart, chic and easy to co-ordinate. How **Not** to Wear Black is a guide for women to find out whether black suits their temperament and their genetic colouring”.

The Radio 2 presenter and author, Janey Lee Grace has written the foreword for the book, and contributors include fitness guru Diana Moran, The Green Goddess, and “Dream Whisperer” Davina Mackail.

Published by O-Books, will be available to purchase through Amazon in September 2011.
